PMP, TOGAF9 & ITIL certified

PROFESSIONAL EXPERIENCE

Project Management Expert & Auditor for Banque de France

Since 2014...

Located in France, Paris

Within the Direction dedicated to Organization & Information, my mission is to support and control a portfolio of IT projects, programs and maintenances of various complexity and size. With a broad monitoring and a deep analysis of activities vitals, I evaluate both practices and standards alignment in order to offer operational and organizational advice and ensure projects drive inception and execution activities at their best.

Using internal standards and industry's best practices (*CMMI, PMBoK, PRINCE2& MSP, SCRUM, ITIL*) my objectives are:

- To provide project and maintenances with the best management advices,
- To report and support decision-making levels,
- To capitalize experience and enrich the Banques' standards.

Manager - IT & Business Consulting

2013

Located in France, Rennes

Through designed-to-fit consulting missions, I provided my clients with services on IT strategy, information systems governance, risk management and operations optimization. In alignment with business oriented objectives, I used a broad experience to lead transformation projects involving technology, IT standards and best practices (TOGAF, ITIL, COBIT) and change management (communication, training, coaching).

Practice Leader & Senior Consultant for Sogeti (Capgemini Group)

2010-2013

Located in France, Rennes

As a consultant of the "Enterprise Solutions Consulting" practice, I provided my clients with consulting services on information systems governance, project management, IS Architecture and business oriented services. My role was to deliver high value content in order to design, plan and reach organizational and operational goals. Using my experience in IT management with the support of broad management skills, I dealt with an extended range of technologies and contexts.

As a Practice leader, I was managing 15 to 20 consultants and conducting various expertise and business activities on both regional and national scales.

Financial Controller and IT optimization expert for ST Microelectronics

2009

Located in Singapore, 6 months contract as internship

The position, held within the *central financial control team*, was mainly built around financial control functions for worldwide operations (data gathering, fields mapping, consolidation, analysis and reporting). Secondary roles included automation and optimization of existing processes but also development and documentation of new tools for financial controllers.
